

New Generation Milling Technology

GRAIN MILLING TECHNOLOGY

www.grainmillingtechnology.com

ABOUT US

Grain Milling Technology is a Professional company offering Grain & Flour Processing Technologies through integrated solution in machines it manufactures. we have an experienced Team of Design, Automation, Quality, Production. We are not only follow the technology, but also produce the technology and shape it with our experiences with our innovative approach, we understand our customer need and serve him customized solution. We have a strong presense across in India as well as Foreign market with machinery installed in more than 200 Mills. through our fast service network and dealers Network in different countries. We are mainly specialized in the Whole Trunkey Project for Wheat Roller Flour Mill & Traditional Chakki Fresh Atta Mill, Maize Grit & Flour Mill Plant, Cleaning & Milling line including design, equipment Production, installation, indication and commissioning. as well as modern electrical control systems.

Grain Milling Technology Provides Turnkey Solutions for Grain & Flour Processing Industry

OUR STRENGTHS

Designing

We have a dedicated, creative and proficient design team that acknowledges the fact that every client's requirements are different and so should be our solutions.

Planning

At this stage, it is utmost important to understand client's expectations along with what can be done to serve them in the best possible manner. Here our research and development team waves its magic wand.

Commissioning

We meet the needs of optimising plants & commission through high quality control phase & testing. Our experience speaks values that offers impeccable services and timely delivery.

**WITH OUR MACHINERY AND THE LATEST TECHNOLOGIES,
WE HELP GRAIN PROCESSORS TO REDUCE ENERGY CONSUMPTION
AND INCREASE THE QUALITY AND QUANTITY OF FINISHED PRODUCTS**

Our Production Plant

Our Production factory, the place where we manufacture high-quality machines & equipment, is located at The Faridabad organised Industrial Zone, which is the global production base in the area of Grain and flour processing technologies. We are using perfect design & Latest technology equipment in the machine production line in our factory with a Skilled workforce.

Technology

with our machinery and the latest technologies, we help grain processors to reduce energy consumption and increase the quality and quantity of finished products.

Customer Focused

Committed to provide total customer satisfaction by products and services.

OUR VISION

To provide high-quality equipment, accessories and services for wheat/Maize and its by-product industries at a competitive price with the priority of customer satisfaction. We are ready to meet the needs and demands of our customers at all times and just in time, Therefore, our sales team pays great attention to satisfying our customers from order to delivery in modern attitudes.

OUR MISSION

We continuously invest in increasing the value of our brands with our experience and outstanding technological applications. GMT is a dependable brand that has gained the trust of all our dealers who want to work with customers, and employees and with whom our GMT ensures customer satisfaction, along with its high-quality products through fast response processes in both the pre-sales and post-sales

OUR CERTIFICATES

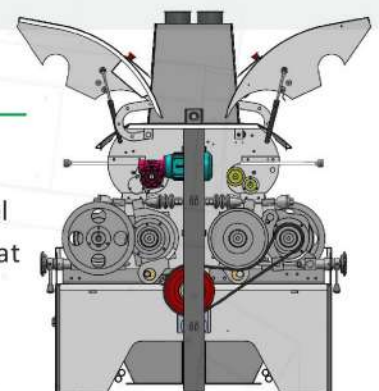

QUALITY POLICY

We provide innovation solutions in accordance with our «9001:2015» quality certificates products «CE» and «ISO Keeping Customer Satisfaction as the first priority Developing and improving Quality which is the basic principle of our quality Manufacturing with attention to international quality management standards, Respect for the environment and protection of the environment with care during production activities, Cooperation with suppliers and customers in quality improvement,

WHY US?

- The indisputable advantages of all models and modifications of our machinery are mobility and autonomy
- Low energy consumption
- Huge range of spare parts
- Warranty service
- Experience from the past
- Commitment to future technologies
- Targeting customer satisfaction at the top level
- High quality with European standards at competitive prices
- Satisfaction with on-time deliveries
- Guaranteed supply of spare parts

Our Manufacturing Products Ranges

**Wheat Roller
Flour Mill Plant**

01

**Traditional Chakki
Fresh Atta Plant**

02

**Maize /
Corn Grit &
Flour Plant**

03

**Millets
Processing
